

# GarageTone™

## Drivetrain Overdrive

Originally designed by Bob Weil in cooperation with Joe Naylor for Reverend Guitars ([www.reverendguitars.com](http://www.reverendguitars.com)) back in 2000, the Reverend Drivetrain has become somewhat of a legend. Now, Visual Sound has repackaged and updated the Drivetrain II as part of the new GarageTone series of pedals, but at a price that any working musician can easily afford. With separate Bass and Treble controls, the GarageTone Drivetrain is one of the best sounding and most versatile overdrive pedals around.

Here are some sample settings to get you started:
