

## Instructions

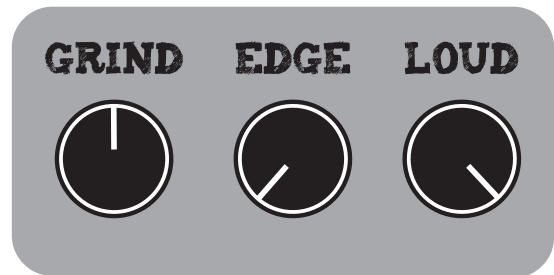

Visual Sound has partnered with the Warped Tour to create a limited edition guitar effect pedal, the Vans Warped Distortion. With appropriately named knobs like Grind, Edge and Loud (translation: Drive, Tone and Volume), the Vans Warped Distortion is totally geared towards Warped Tour inspired guitarists. With grinding low-end distortion, it will make you just want to turn all the knobs to "10" and let it rip. Visual Sound has put all the road-tested features of their renowned V2 Series pedals into the Warped Distortion, so you won't ever have to worry about it dying on you in the middle of a gig.

The staff of Vans and the Warped Tour were stoked when Visual Sound brought this pedal to them. So many bands on the Warped Tour use Visual Sound products, so it was a natural fit. The pedal looks and sounds amazing too!

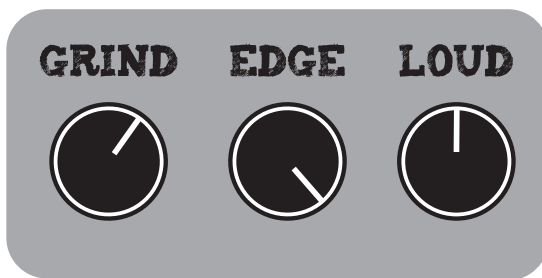

Here are some settings to get you started:

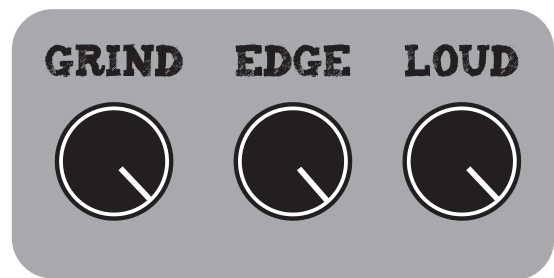

**OLD SCHOOL**

**MELLOW DARKNESS**

**SWEET GRIND**

**TOTALLY AMPED**
